

Find a Laser Provider

We receive hundreds of calls and emails each week and many more website visits to our online Find a Provider from potential patients trying to locate a laser provider in their area using the Erchonia lasers. We offer all Erchonia Laser customers a chance to advertise their business on our website. You will be able to put your name, specialty, address, telephone, email and website so these patients will be able to find your listing in our Find a Provider by simply entering a zip code. The Erchonia Find a Provider is an exclusive service provided for healthcare professionals that own Erchonia laser devices. The primary reason for the service is to ensure patients locate a healthcare professional, within a specific discipline, across the multiple fields of medicine represented by our laser customers.

With so many patients looking to take control of their own health care options, we are proud to assist in helping them find the best care available, and to help those physicians who are constantly evaluating the best methods for treating their patients and who are on the cutting edge of technology to advance their practice.

We sincerely thank you for your business, and are very excited about the future of low level laser therapy (3LT®) and its applications in the medical field.
