

Program Title: The New Standard of Laser Therapy for Animal Care

Presenter: Dave Huff, DVM

Date: 6/18/22

Time: 10:00-5:15pm EST

Method of Delivery: Classroom/Online/Distance Based Learning

Program Description:

This 6-hour seminar will be an interactive overview of the low-level laser technology and its use in small animal medicine. A basic overview of the physics and understanding of light energy and its use in this technology. Practical business information to help understand how best to incorporate this technology in your practice and present it successfully to your staff and clients. Attendees will see the practical application and potential outcomes. Dr. Huff will share a plethora of case studies & case history through videos and photos. In addition, he will provide many hands-on examples of low-level laser use that will be demonstrated to eager physicians. There will be ample time for questions and answers to ensure a complete understanding.

Seminar Objectives:

This webinar will provide a comprehensive look at the use of low-level laser in small animal medicine. After this teaching the practitioner should understand the basic physics and important characteristics of low-level laser. They will be able to explain the technology to their staff and clients. An understanding of practical applications of the low-level laser in practice, with examples of how to add it successfully to their practice. They will get video of hands-on use of the laser on patients and then be exposed to many various cases from Dr Huff's practice and experience. These cases will include videos and photos as well as case history.

Seminar Outline

9:30-10:00am	Registration
10:00-11:00am	General Laser Physics, and how and why the low-level laser works.
11:00-12:00pm	Brief Recap of Physics, then Case studies to include but not limited to cases involving pain management, wound healing, post-surgery treatments and neurologic cases. Both photos and videos will be reviewed and presented.
12:00-1:00pm	Lunch
1:00-2:00pm	More Case Studies concentrating on CCL treatments in dogs and cats. Videos of patients throughout the 4-month treatment cycle. Explanation of protocols, costs and expectations of outcomes, including retrospective client survey.

2:00-3:00pm	Business Strategy of utilizing Low Level Laser in the practice. Overview of best ways to introduce the technology to your staff and to your clients. Understanding the impact, the technology can have in your practice.
3:00-3:15pm	Break
3:15-4:15pm	Additional case studies and demonstrations of hands-on use of the laser.
4:15-5:15pm	Each session will have a 10-minute question and answer session after 50 minutes of teaching. This hour will be used to facilitate questions and to introduce other modalities to mix with the laser. We will have additional case studies to present if time allows.
