

EMERALD™  
LASER

Before

After

**Fast Treatment Times**

**No Downtime or Side-Effects**

**Customizable Treatment Packages**

EMERALD LASER™ is the only low level laser in the world that has been given FDA market clearance for overall body circumference reduction in patients with small pockets of fat, to individuals with a BMI up to 40. The laser works as a natural alternative for fat loss by using low level lasers to create temporary pores in the fat cells, allowing the fatty liquids to seep out and be naturally flushed out through your lymphatic system.

Most clients who undergo the Emerald™ process focus on their waist, thighs and hips, but it can also be used on other problem areas such as the arms, neck, ankles, chest and back due to its clearance to treat the overall body.

The treatment is straight forward with no side effects. Your Emerald™ provider will have you lie on a table for approx. 30 minutes, while 10 lasers are applied to the target areas of fat simultaneously. See dramatic results by undergoing this treatment as few as 8 times.
