

ARE YOU STRUGGLING WITH CHRONIC PAIN?

Chronic pain affects more Americans than diabetes, heart disease and cancer combined. 50% of all working Americans admit to having back pain symptoms every year. In fact, back pain is one of the most common reason for missed work. It is also the second most common reason for people to consult their physician. It has been estimated that Americans spend as much as \$50 billion each year in search of relief to back pain. Discover how the FX Series can provide lasting relief to your patients who deal with lower back pain.

ERCHONIA
World Leaders in Low Level Laser Technology

HOW IT WORKS

The FX Series uses low-level laser technology and patented laser diode arms to precisely target lower back pain centers. It reduces inflammation while promoting bio-stimulation at a cellular level in the musculoskeletal point of the pain's origination. Unlike other lasers that are too strong and unreliable — and produce unwanted heat — the FX Series is fully compliant with ISO 13485 Medical Device Quality and IEC 60825-1 Laser Safety.

Patients with chronic low back pain who choose FX Series treatments experience improved comfort and quality of life without the risks associated with the side effects of opioids or nonsteroidal anti-inflammatory drugs (NSAIDs) that can cause ulcers, bleeding, kidney disease and heart attacks.

If you have chronic pain or heel pain associated with Plantar Fasciitis, then ask us about our FX Series treatment packages and get back to doing the things you love!

No Heat

No Downtime

No Side-effects

Amazing Results!
