No Downtime or Side-Effects

Fast Treatment Times

EMERALD LASER™ is the only low level laser in the world that has been given FDA market clearance for overall body circumference reduction in patients with small pockets of fat, to individuals with a BMI up to 40. The laser works as a natural alternative for fat loss by using low level lasers to create a temporary pore in the fat cells, allowing the fatty liquids to seep out of the cell and be naturally flushed out through your lymphatic system.

The world's most advanced fat loss laser is ready & waiting for you. Ask us about our treatment packages today! Learn more at our front desk or at:
