

WEIGHT LOSS TECHNOLOGY BACKED BY DATA

This non-invasive technology is the first laser specifically designed for body contouring and has been repeatedly tested in clinical settings to safely shrink fatty cells. With the ZERONA®Z6 Laser, your weight loss journey is **backed with the confidence of the manufacturer's 22 FDA market clearances.**

Its impactful results happen through a gentle process of shrinking the fat cells and safely disposing of the fatty liquids through the body's natural lymphatic system. While many other fat reduction technologies may harm the body's fat cells, ZERONA®Z6 technology protects the body's fat cells by not killing or damaging them in the treatment process. As a result, the fat cells will be restored to a lean fat cell in a much healthier state.

Patients have reported seeing results as soon as 2 weeks after starting treatment, and best of all - the ZERONA®Z6 Laser has:

✓ No swelling ✓ No bruising ✓ No downtime

With the industry-leading results patients experience with ZERONA®Z6 treatments, you can make your weight loss journey decisions with certainty.

Kickstart your body transformation by consulting our knowledgeable team today!
