

TOP NOTCH TECHNOLOGY WITH **PRO**VEN RESULTS

Having the best of the best means top results with no invasiveness. That is exactly what Emerald technology offers patients! Applied externally, you can expect to receive the results of a high-dollar procedure without the potential side effects and downtime afterward. That makes the non-surgical Emerald option no-brainer.

The Emerald gently transforms unhealthy fatty cells for patients with a BMI of 25 - 40 and then safely renews them to healthy lean fat cells. Low level lasers create temporary pores in the cells so the fatty liquid can safely exit through the body's natural lymphatic process - never damaging the body's necessary parts of fat cells.

In addition to results, this option provides peace of mind that your body is being treated with a gentle yet effective alternative method.

- ✓ **NO SURGERY OR NEEDLES**
- ✓ **NO BRUISING OR PAIN**
- ✓ **NO RECOVERY PERIOD**

Regain your confidence and invest in your health with the Emerald fat loss technology.
