

WE TREAT YOUR PAIN EFFECTIVELY & NON-INVASIVELY

The GVL by Erchonia® is the world's most energetic laser producing outstanding clinical outcomes with no known side-effects.

The GVL was shown to be the most effective wavelength combination for increasing the range of motion and decreasing pain in a single session through clinical testing; This is the first and only green FDA cleared green/violet laser for use in pain relief.

Improvement in pain from baseline to immediately after (1) treatment.

*Clinical Study Results

How does it work?

Low-level laser light is absorbed through your skin and into your mitochondria (the powerhouse of your cell); The stimulation from the laser light into the mitochondria increases your ATP production. ATP is the primary energy source for a majority of cellular functions. The ATP activates cell recovery enzymes, reduces inflammation & restores normal cell function.
