

A SEASON OF CHANGE

- ❖ **World's First Violet Fat Loss Laser**
- ❖ **Targeted Non-Invasive Technology**
- ❖ **Up to 3.91 Inches Lost in a Few Weeks**

Fall for Innovation

Just as autumn reminds us of change and gratitude, the ZERONA® VZ8 introduces a revolutionary shift in body contouring technology. As the world's first violet fat loss laser, this high-scale innovation uses 8 advanced laser heads to precisely target fat cells beneath the skin, creating a temporary opening that allows fatty liquids to be naturally flushed away through the lymphatic system.

No surgery. No discomfort. Just transformation worth celebrating this season and beyond.
