

HAPPY NEW YEAR!

CELEBRATE THE NEW YEAR WITH A NEW YOU

SEE AMAZING RESULTS IN AS LITTLE AS 2 WEEKS
WITH THE WORLD'S MOST ADVANCED FAT LOSS LASER

Zerona® is a full body fat loss treatment that allows clients to target areas of stubborn fat, and is the first laser specifically designed for body contouring. The technology is FDA Market-Cleared, non-invasive and clinically tested. Applied externally, the laser targets excess fat by emulsifying fatty tissue through the use of cold laser technology developed by Erchonia. It provides an alternative fat loss treatment without the adverse side effects associated with surgical and other weight loss procedures like liposuction and body wraps.

ZERONA ADVANTAGE
