

EMERALD™
LASER

THE BEST FOR THE BEST

This Mother's Day, give her the gift of the most premier body contouring product on the market. The non-invasive Emerald Laser is a best-in-class low-level laser that can begin to transform a silhouette in just a few treatment sessions, all without needles or medicines.

Using the body's natural lymphatic system, Emerald converts unhealthy fatty cells into lean, healthy fat cells in a series of short, 30-minute treatment sessions. By emulsifying the fat inside of unhealthy cells, it allows the liquid to pass through pores and dispose naturally and effectively. Plus, every treatment plan is catered to each individual's unique body goals.

Emerald Laser Features:

Tested On BMIs <40

Targets Specific Pesky Fat Areas

Results In As Little As 2 Weeks

Treat her to the confidence-boosting power of Emerald Laser. She deserves it!
