ABOUT TREATMENT:

The Erchonia Lunula laser uses low level laser light to target toenail fungus. Lunula is FDA market cleared to effectively target the appearance of this unsightly and sometimes painfully troublesome condition. In as little as four weekly 12-minute treatments, you can regain your flip-flop and barefoot freedom. Unlike other hot lasers that claim to treat toenail fungus or onychomycosis, the Lunula is the **only, pain-free, non-thermal laser** that has no dangerous smoke plumes or vapors and requires no anesthesia.

Lunula is free from the serious health risks associated with oral fungus medications and is completely painless, unlike other laser options. Lunula treatments are safe, easy, & convenient.
