

GHOST YOUR PAIN.

Leave pain in the shadows with
advanced laser therapy.

ADVANCED LASER THERAPY FOR PAIN RELIEF

Erchonia low-level laser therapy uses
specific wavelengths of visible light
to support cellular function and help
the body's natural recovery process.

NON-INVASIVE

NO DOWNTIME

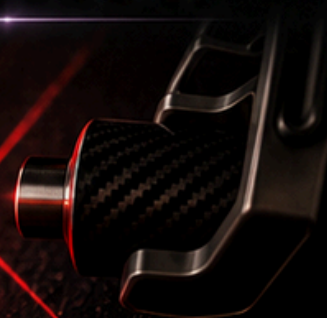

CLINICALLY STUDIED

HOW IT WORKS

Erchonia low-level lasers use visible
light to stimulate the mitochondria—
the part of the cell responsible for
producing energy.

More cellular energy may help support:

- Reduced pain and inflammation
- Faster recovery
- Improved function
- Natural healing processes
